DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 26, drawn to a method of operating a computerized control system for a hospital bed using plural modules, a communication network, and a display, classified in class 700, subclass 17.
- II. Claims 27 to 33, drawn to a hospital bed with an integrated display system, classified in class 5, subclass 600.

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions can be used for separate ends-as an example the display set forth in claims 27 to 33 can be used as a television and not a control display. The control method of claim 1 to 26 could be used upon a differing type of furniture, such as a motor operated chair.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
